PROFILE SUMMARY

I am a dynamic IT professional with a diverse skill set and a willingness to learn new things. I am passionate about Web Development and Graphic Design. I take pride in promoting organizations through effective websites, web applications, and visually appealing marketing materials. With a strong dedication to embracing new opportunities, I am poised to contribute to growth and success across various domains.

PROJECTS

ONLINE FOOD ORDER & DELIVERY WEB APP

- Built a Progressive Web Application (PWA) that allows users to browse through the restaurant's menu, place order and track them.
- The app has Admin panel from which the restaurant's catalog, orders, and user roles can be managed.
- Technologies used are ReactJS & Tailwind CSS for Front End, Firestore Database, Sanity CMS, 2Factor Authentication, and Firebase Hosting.

INDUSTRIAL CONTRACTING PORTFOLIO WEBSITE

- Developed a portfolio website and profile brochure for an Industrial Contracting startup.
- Utilized animate.css to make animations to enhance user experience of the portfolio.
- Built with HTML, CSS, Bootstrap, and JQuery. And deployed using Github Pages.

E-COMMERCE WEB APP FOR A GOAT FEED STARTUP

- Built an E-Commerce web app that allows users to purchase goat feeds and related products online.
- Utilized Razorpay to make online payments more accessible.
- The app was made using Django, HTML, Bootstrap, JavaScript, Ajax, PostgreSQL, and deployed to AWS EC2 using Nginx and Gunicorn.

REAL ESTATE PORTFOLIO WEBSITE

- Developed a portfolio website for a real estate company showcasing their completed, ongoing, and upcoming real-estate projects.
- Built with HTML, CSS, Bootstrap, and JavaScript. And deployed using Github Pages.

E-LEARNING WEB APPLICATION

- Built an E-Learning Web application using Django that allows users to browse through the courses and enroll into them.
- The app allowed teachers to register and publish their courses.
- The app was made using Django, HTML, Bootstrap, JavaScript, Ajax, PostgreSQL.
